EduTrack User Manual

Last updated: April 24 2025

What is EduTrack?

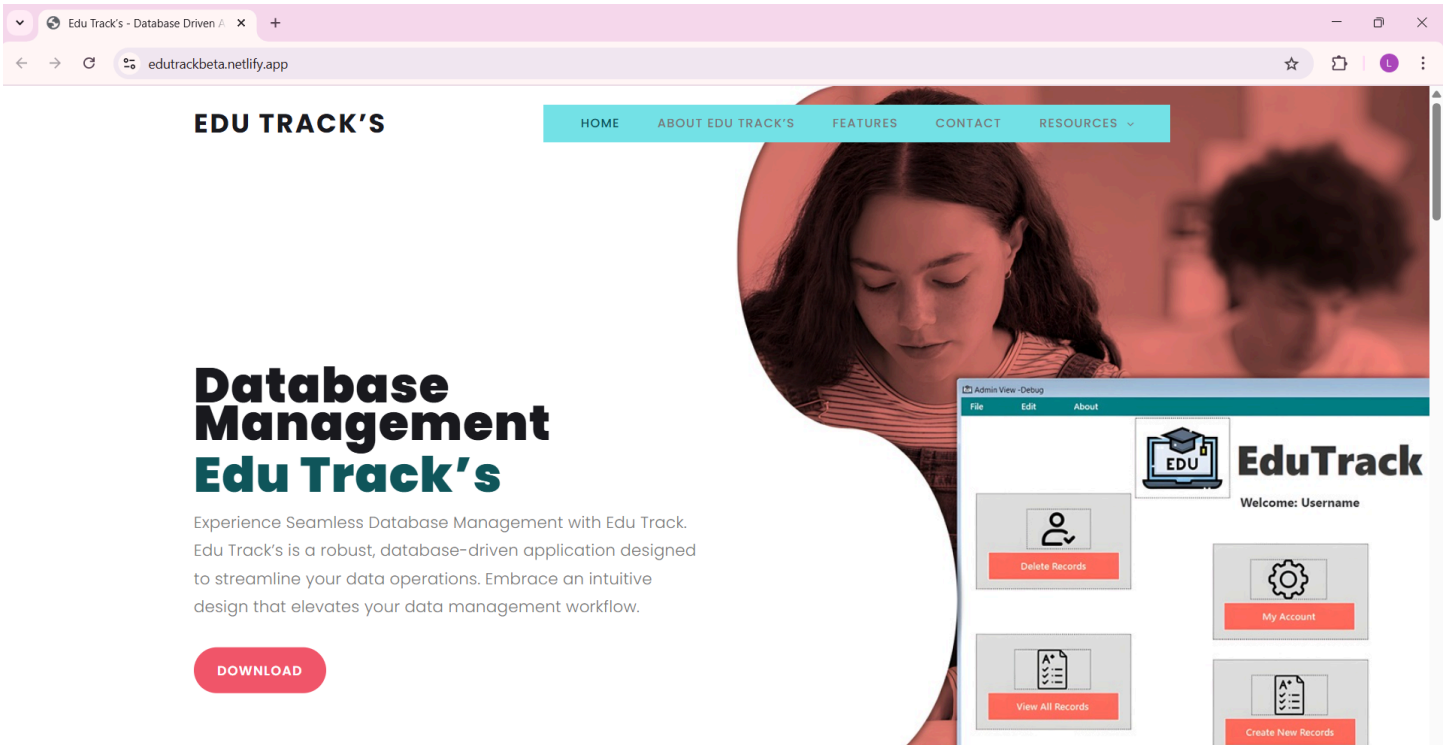

EduTrack is a smart and efficient attendance tracking system designed for schools and other educational institutions. The app supports three types of user sign-ins: Admin, Teacher, and Student. Each role has specific features tailored to its responsibilities, making it easy to manage and monitor attendance records in real-time. EduTrack helps simplify daily attendance tasks, improve transparency, and keep everyone informed.

Let's Get Started!

How to install

You can easily install our app by visiting our online website https://edutrackbeta.netlify.app

Here you could find some key features you will find in EduTrack, contact information and resources.

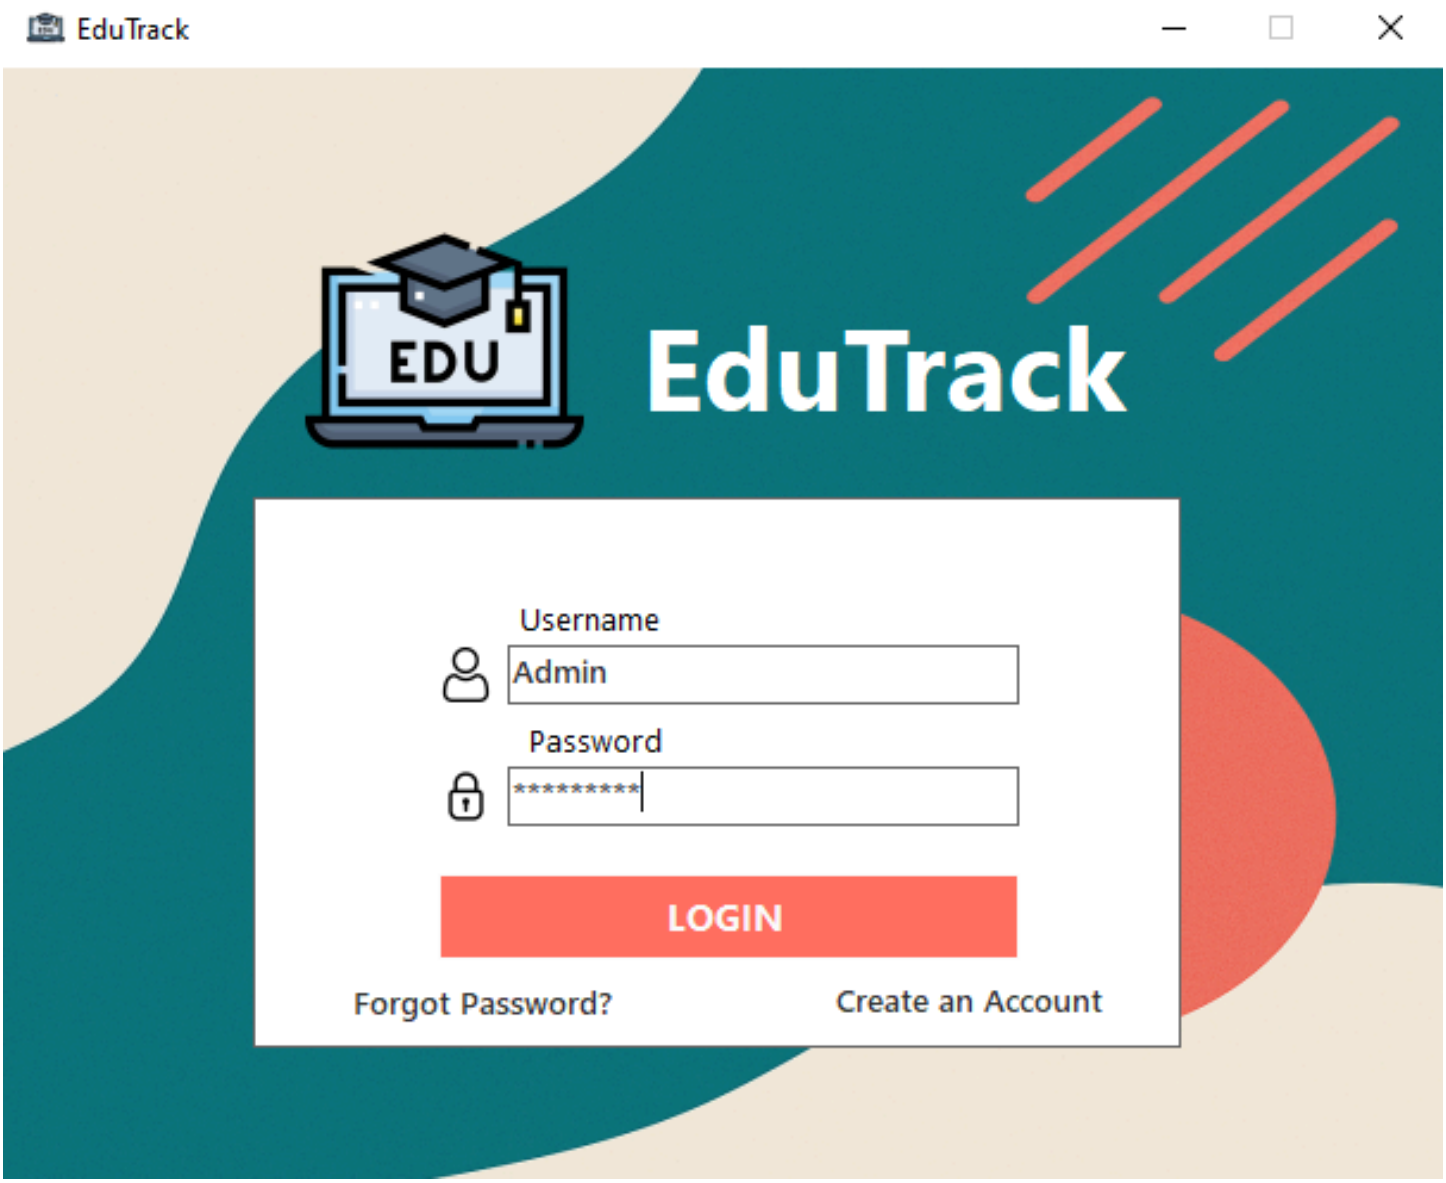

Simply click on the Download button! :)

Log in

Once you've installed the app you will be directed to a log in page. Here you will enter your given account information given by the admin, including your username and password.

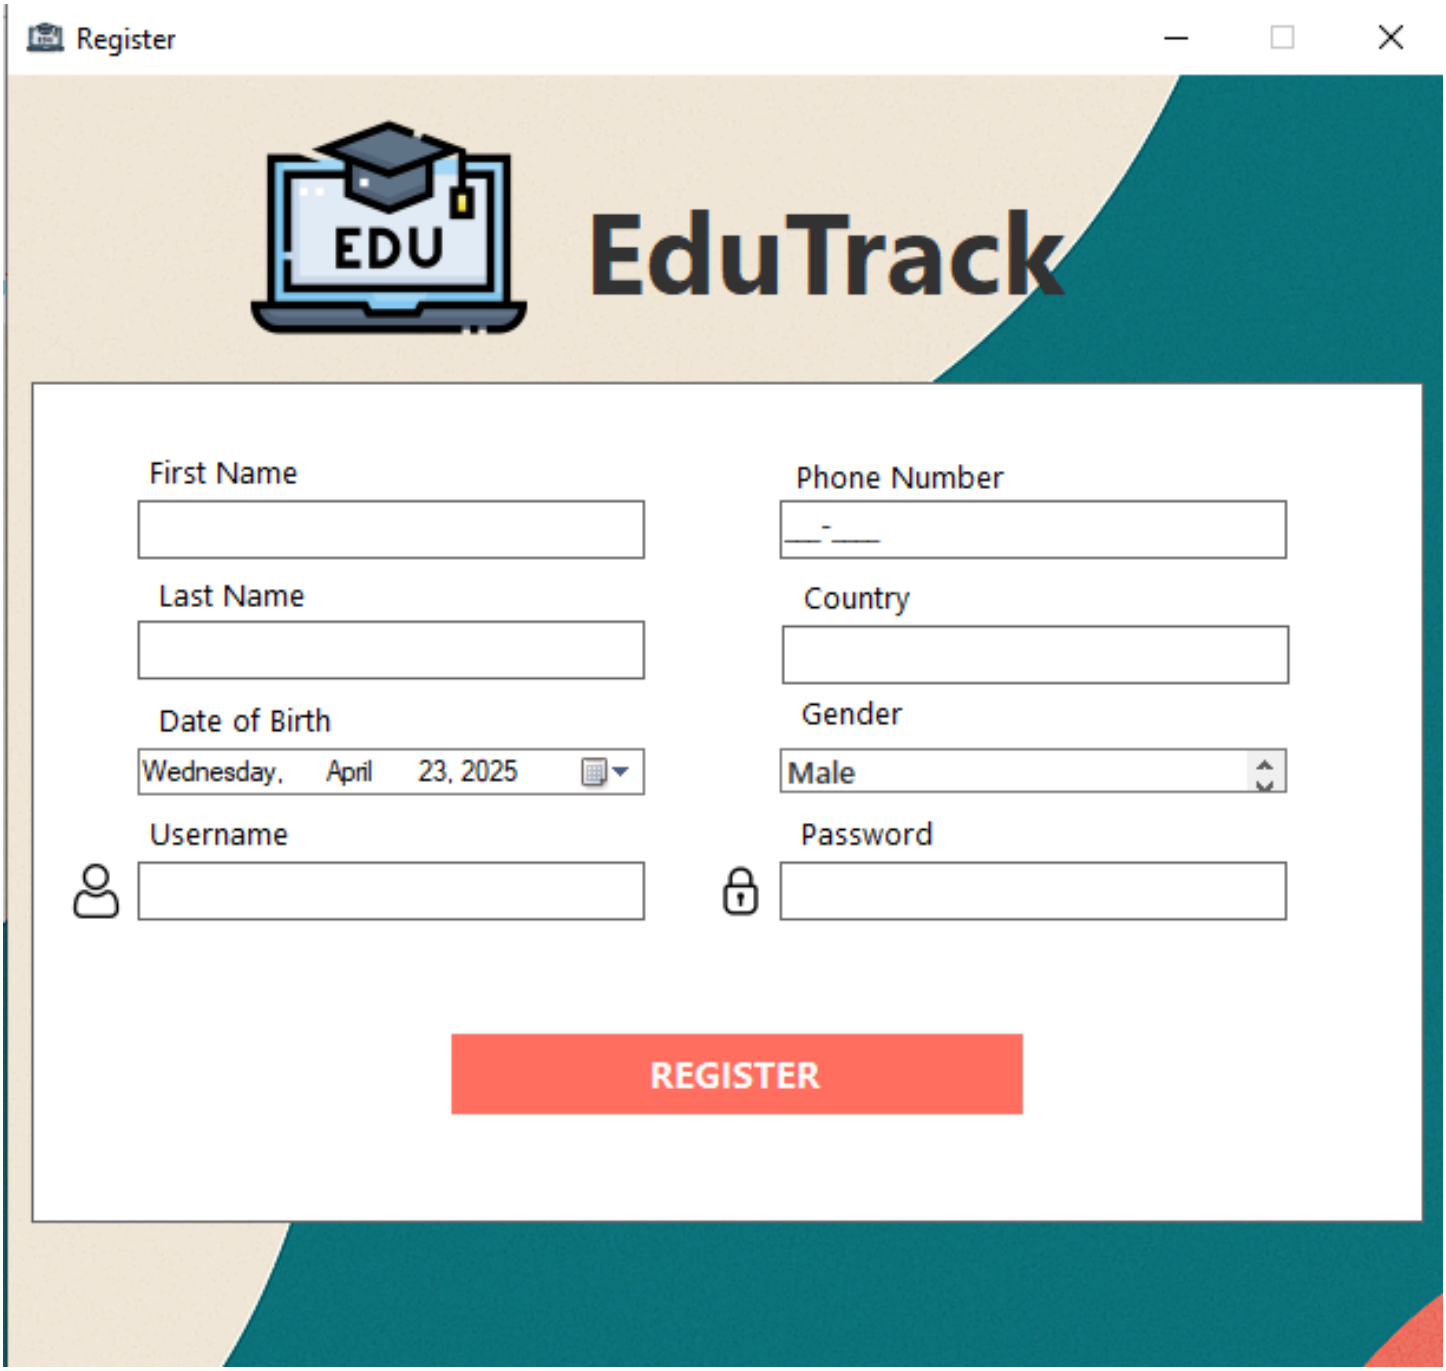

There are 3 roles you could log in as.

- Admin - oversees all app activities and can create new accounts
- Teacher - oversees students attendance
- Student - views their own individual attendance records

Registration

After clicking the “Create account” button you will be directed to a Registration form. Simply fill out the form with the corresponding information.

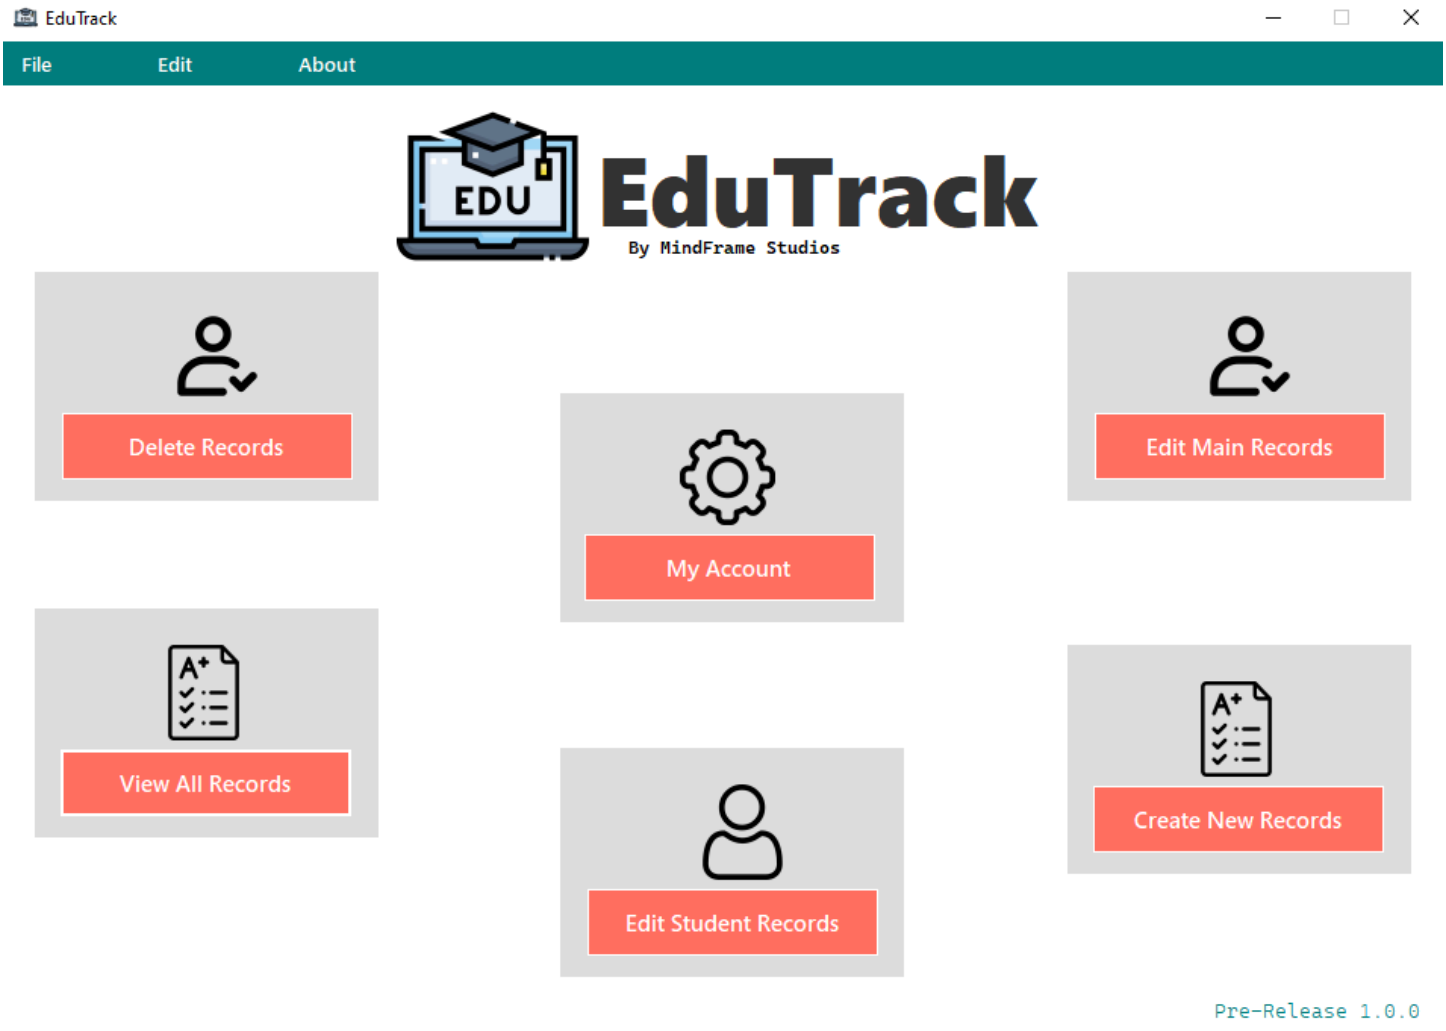

Once it has been filled out and submitted it will go through the administrator who will then verify it and officially create your account.

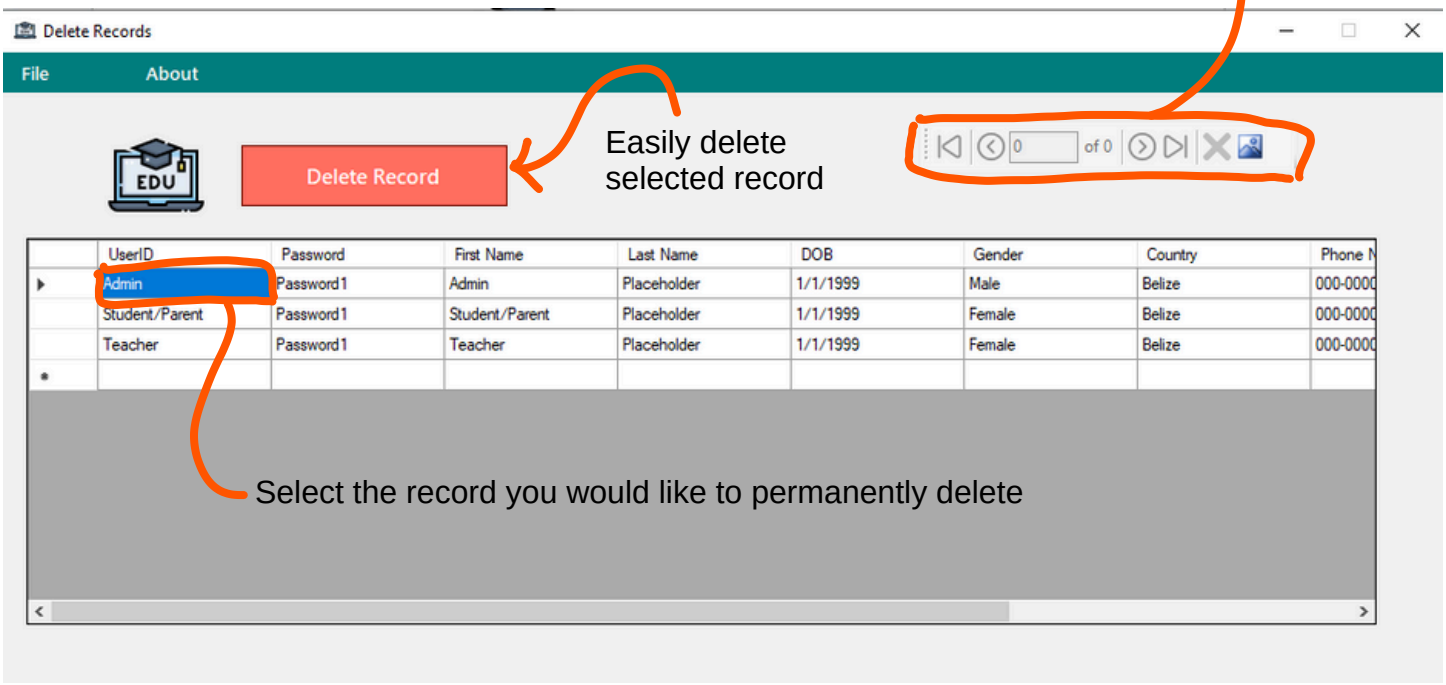

Different Roles

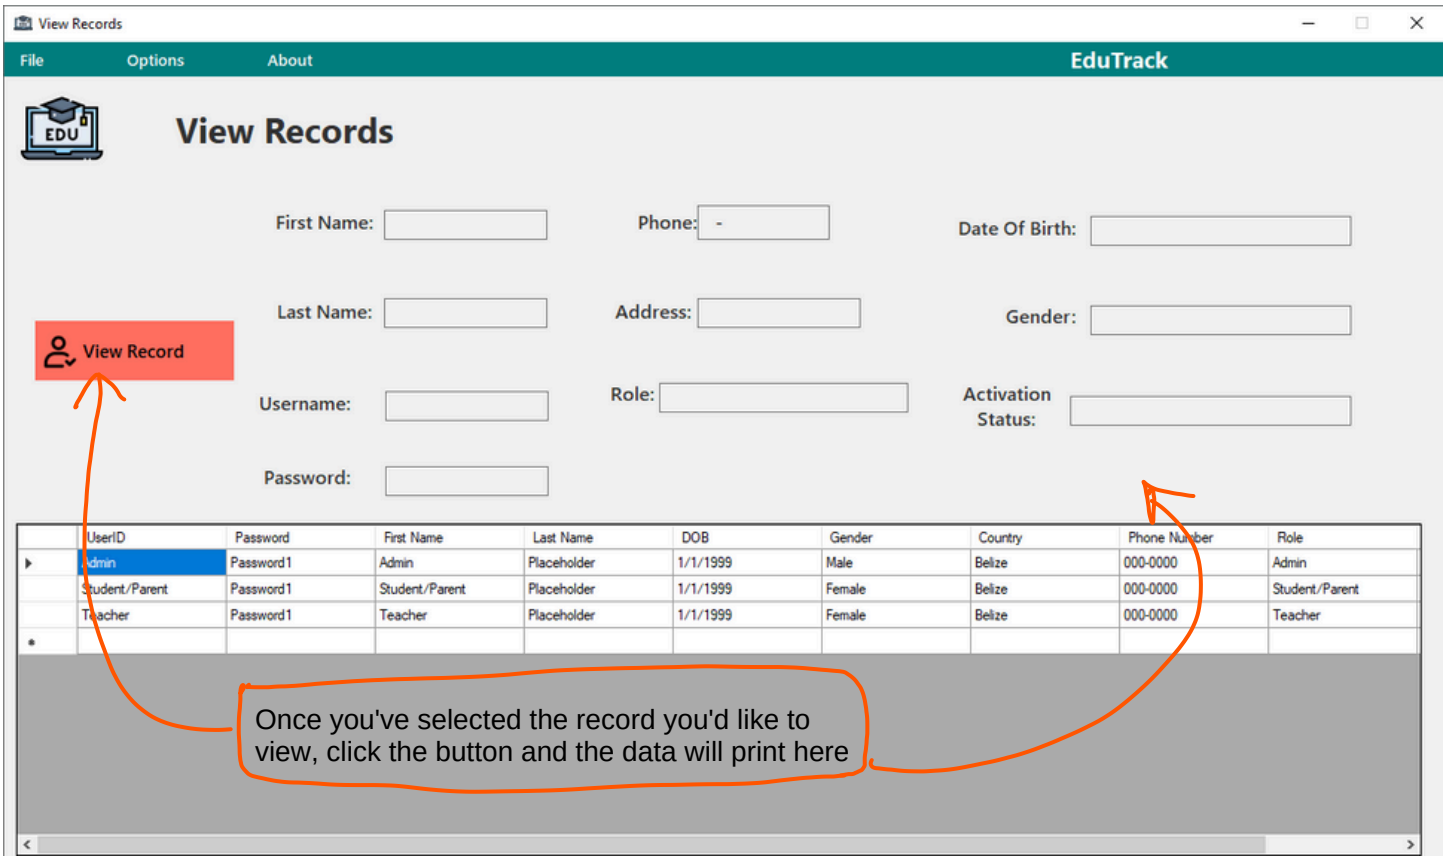

Admin View

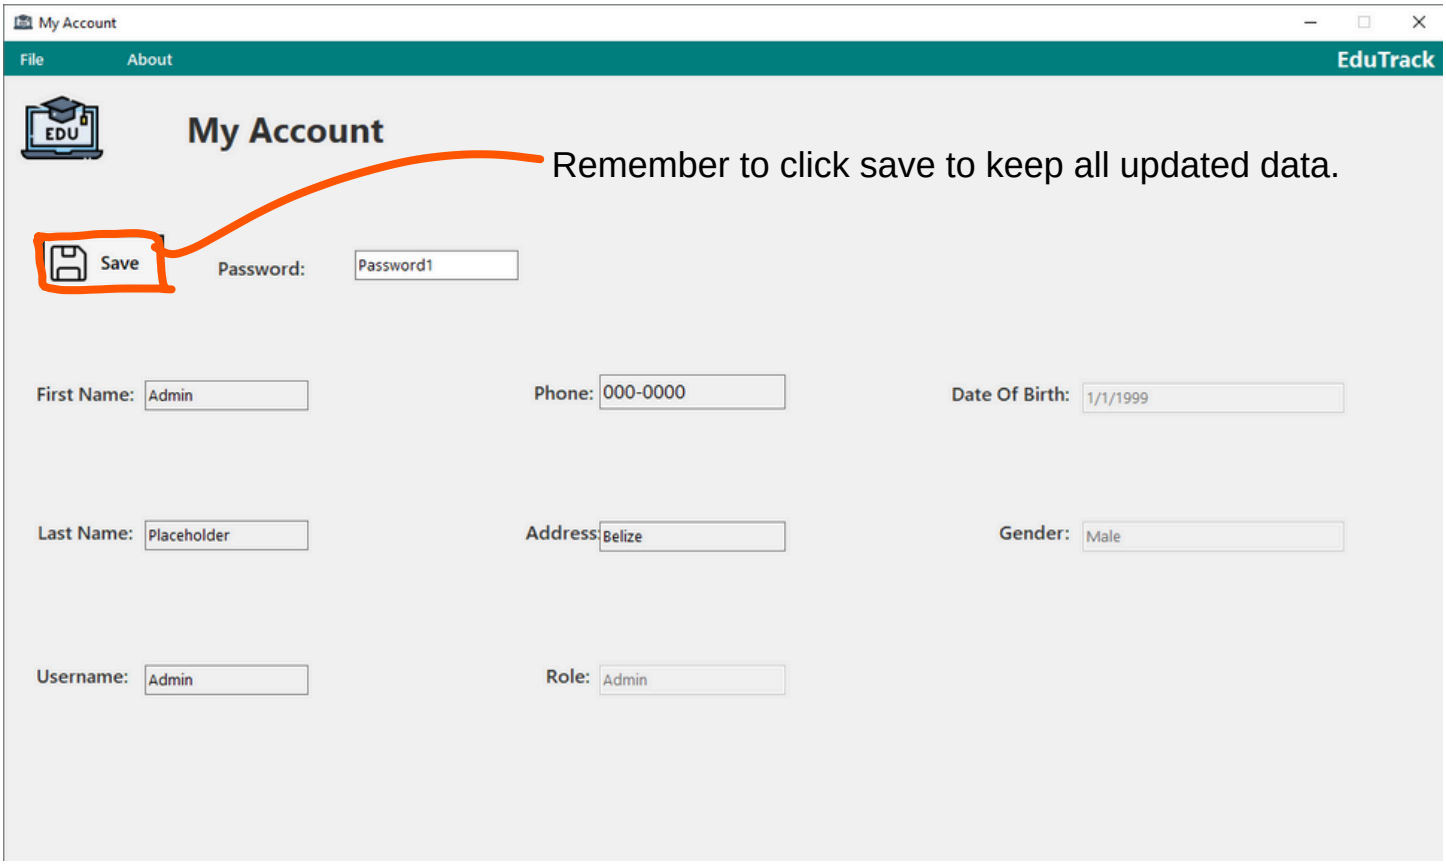

The Administrator has full access to the system. This role can:

- Create, edit, and delete student and main attendance records
- View all attendance data across the platform
- Manage user accounts
- Access and update their own account details

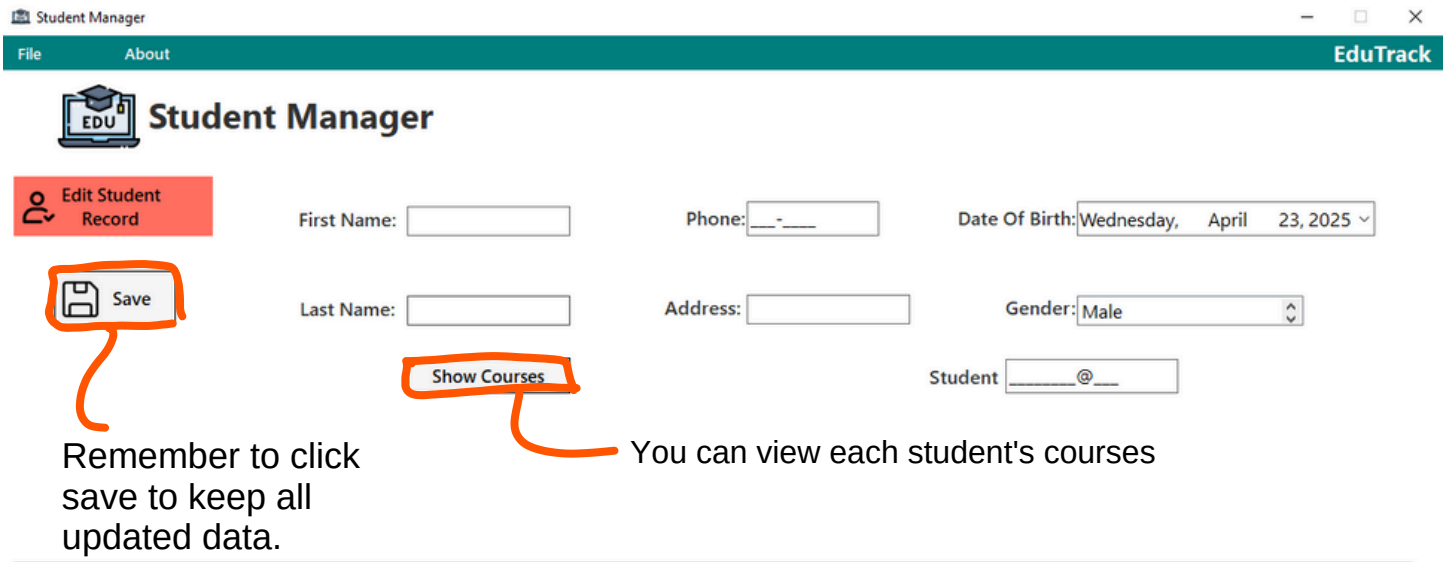

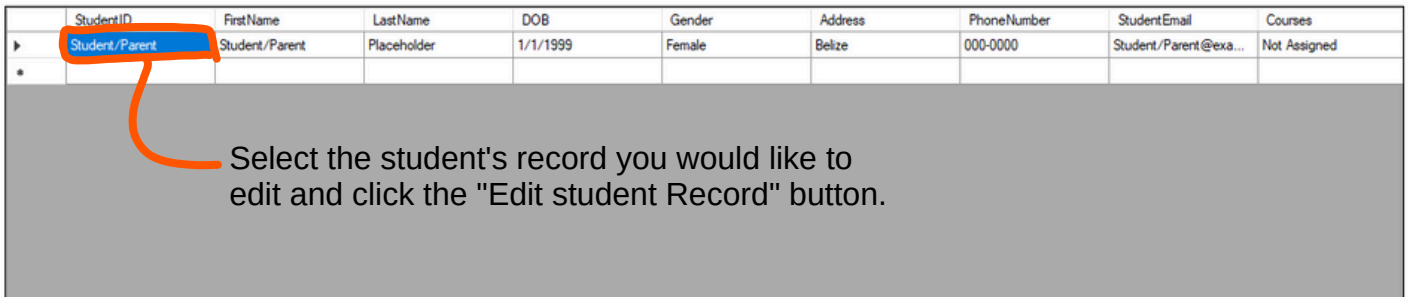

Navigate through records using these controls

Select the record you'd like to edit or update and simply press the "Edit Main Record" button.

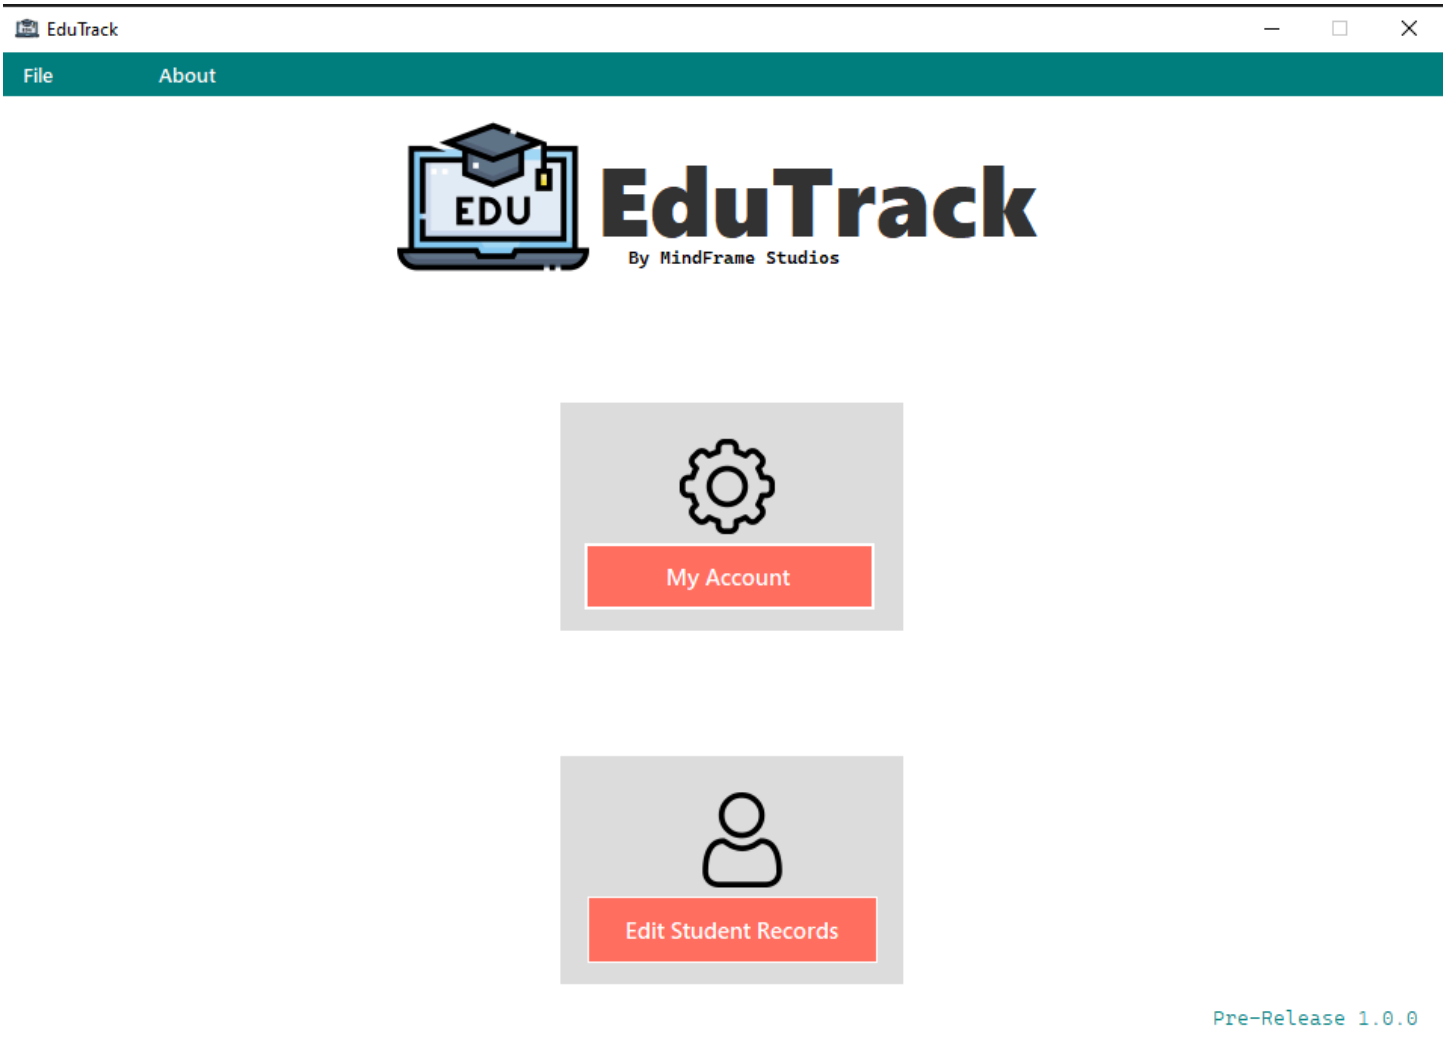

In this form you can add new records as the admin. Simply fil in all necessary data and click the "Add Record" button.

Teacher View

Teachers have access to features relevant to classroom management. This role can:

- Edit student attendance records
- View and update their own account details

Student View

Students have limited access focused on personal information. This role can:

- View their own account details, including attendance history
